

My Taskking

MyTaskKing — Product Features

Mobile App (Android)

Communication

- Team chat — direct messages, group chats, and client channels
- Text, files, photos, and voice notes
- Voice and video calls from chat
- Incoming call alerts with accept/decline
- Group video meetings — create rooms, join by ID, return to live sessions
- Call history with notes and call-back
- Emergency buzzer on calls (custom alert sounds)

Work & productivity

- Task management — create, assign, accept, complete, filter, and search
- Task reports — submit and review
- Shared calendar — week and month views
- Dashboard — daily overview, check-in reminder, today's tasks, live meetings, weekly stats, leaderboard
- Global search — people, messages, and files
- Notifications inbox and saved items
- Light/dark themes and colour themes

Daily workday

- Check-in with a written daily plan
- Lunch break tracking
- Check-out with end-of-day report
- Workday streak tracking

People

- Employee directory — search and start a chat
- Client directory (managers/admins) — client channels and accounts

Profile & security

- Profile photo, availability status, phone number
- Active sessions — see and manage signed-in devices

Windows Desktop App

Included

- Sidebar workspace — dashboard, chat, tasks, calendar, notifications, settings, profile
- Full team chat — read and send messages, attachments, task links
- Task board and task details
- Call and meeting **history** (view and add notes)
- Dashboard, announcements, saved items, employee directory
- Reports and clients (managers/admins)
- System tray — open, sign out, or quit; minimize to background
- Work Activity tracking for staff — periodic “Are you working?” check with desktop capture (interval set by admin: 2 min to 1 hour)
- Scheduled auto sign-out (configurable; admins exempt)
- Theme and appearance settings

Not on Windows (by design)

- No live voice or video calls
- No joining or creating live meetings — use mobile for calls and meetings
- Call and meeting lists are **history only**
- Telecaller phone dialling — use mobile for outbound calls

Telecaller

Mobile (full telecaller experience)

- Dedicated workspace — Chat, Leads, Home, Calls, More
- Lead pipeline — New, Contacted, Interested, Follow-up, Won, Lost
- Search and filter leads
- One-tap outbound calls via phone dealer
- Call logging and recording upload (device or in-app)
- Post-call outcome, notes, and recording workflow
- Add new leads

Windows / desktop

- View and manage leads (search, filter, admin bulk assign)
- Outbound calling and recording — **mobile only**

Organisation Admin

People & access

- Add, edit, and remove employees (Admin, Manager, Coordinator, Employee, Telecaller)
- Create and manage client accounts and channels
- Employee directory and session oversight

Oversight & analytics

- Work Activity — review desktop captures and notes by employee and date
- Login Activity — who signed in, when, from which device
- Call recordings — team calls, meetings, telecaller uploads
- AI Review — summaries and insights from recordings
- Deleted chats — review and restore removed messages
- Analytics — messages, users, calls, tasks, attendance, telecaller performance
- Talk time and live activity reports

Workspace settings

- Announcements
- Emergency call buzzer — on/off, custom sounds, head office name
- Desktop Work Activity check interval (2 min, 5 min, 15 min, 30 min, 1 hour)
- Role-based permissions for tasks, chat, calls, and files

Exempt from Windows scheduled auto sign-out

Organisations (multi-Company)

- Each company has a **private, isolated workspace**
- Sign in with Organisation ID, User ID, and password
- Self-service company registration — pending until approved
- Organisation status — Pending, Active, or Suspended
- Company branding (colours and identity)
- All data — chat, tasks, calls, leads, files, attendance — kept separate per organisation

Platform Super Admin

- View and manage **all customer organisations**
- Create organisations and admin accounts
- Approve, reject, activate, or suspend any company

- Update organisation name and branding
- Cross-organisation visibility for recordings and AI Review
- Full platform navigation including Organisations
- Exempt from Windows scheduled auto sign-out

Role Summary

Role	Highlights
Employee	Chat, tasks, workday, meetings, calendar
Manager	Above + clients and team management
Telecaller	Chat, leads, calls, dashboard
Client	Chat, Settings, dashboard
Org Admin	Full workspace + recordings, AI review, activity, settings
Platform Super Admin	Everything above + all organisations

What Problem It Solves

MyTaskKing replaces scattered WhatsApp groups, missed follow-ups, and invisible remote work with one secure company workspace. Teams chat, call, meet, and manage tasks in one place; telecaller log every lead and recording; managers see who checked in, who is working, and who answered calls. Admins get recordings, AI insights, and login history. Each organisation stays private. Android handles field work and calling; Windows keeps desktop staff accountable without distraction—so leaders run the business with clarity, not guesswork.
